

THE EAGLE EYE

AI-6820 Series

2D BarCode Imager

AI-6820 Series, the first model of Argox wired 2D Imager Scanner for light-industry grade, Eagle-eye grade reading engine that has enhanced performance on 4 mil labels for small IT-components, Jewelry labels and so on. The transmission rate is also 3 times faster than the competitors within its class which will greatly increase your efficiency and minimize your downtime.

AI-6820 Series has built in Cross-Line laser targeting design which allows you to work perfectly under ultra-white light and insufficient light source environment with on demand scanning accuracy. It will greatly reduce the user's fatigue.

Transcendence of its class

The heavy-duty design of AI-6820 Series is certified by IP65 with drop rate resistance of 1.8 meter vertical distance to prevent any data loss and transmission. The enhanced alert beep has dynamic setting that fits your working environment even under high-noise condition and it also provides vibration alert.

Accuracy and Precision

The era of Big Data is coming, AI-6820 Series comes with DataMagic data editing software to enhance your usability. It takes no time to complete the setting with the user-friendly UI design; you will be able to complete the data analysis in no time. You no longer will need to spend additional resource on SI companies for job like this!

The rising trend of mobile device, each device will be required to transmit data through different platform and it is becoming the norm. Barcode is digitalized and it will be displayed on variety of electronic devices. AI-6820 Series has high readability on electronic display like tablet and cell phone to have high accuracy barcode reading ability.
